

Personal Income by State and Region, First Quarter 1996

This article was written by Duke Tran. The quarterly estimates of State personal income were prepared by the Regional Economic Measurement Division.

PERSONAL INCOME in the Nation in the first quarter of 1996 increased 1.2 percent, the same rate as in the fourth quarter of 1995.¹ The first-quarter increase in personal income was double the 0.6-percent increase in the prices paid by U.S. consumers (as measured by the chain-type price index for personal consumption expenditures). By State, the increase in personal income exceeded the increase in U.S. prices in 43 States.

Tables 1 and 2 at the end of this article present the quarterly estimates of total and nonfarm State

personal income, beginning with the first quarter of 1993.

Fastest growing States

In 13 States, personal income in the first quarter increased at least 0.6 percentage point more than the U.S. average (table A and chart 1). Nine of these States are in the western United States: The Rocky Mountain States of Idaho, Utah, Wyoming, and Montana; the Far West States of Washington, Nevada, and Oregon; and the Southwest States of Arizona and New Mexico. The other four States are the Plains States of

1. In this article, percent changes are at quarterly—not at annual—rates.

CHART 1

Personal Income: Percent Change, 1995:IV – 1996:I

Kansas and Nebraska and the Southeast States of Georgia and Florida.

In most of the nine fastest growing western States, the growth in personal income was boosted by above-average increases in earnings in farming, construction, durable goods manufac-

44	Pennsylvania6	.3	.2	2.0
45	Hawaii6	.6	-.8	1.8
46	Massachusetts6	.3	.3	2.0
47	New Jersey6	.5	0	1.7
48	Ohio5	.1	.3	2.1
49	Delaware	0	-.7	.6	2.3
50	Michigan	-.6	-1.3	-.1	2.1

1. Net earnings by place of residence is calculated as earnings by place of work less personal contributions for social insurance plus the adjustment for residence. Earnings by place of work is calculated as the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income.

turing, and retail trade (table B).² Earnings also increased at above-average rates in the following industries and States: In mining in Nevada, Oregon, New Mexico, and Wyoming; in nondurable goods manufacturing in Idaho, Washington, and Wyoming; in transportation and public utilities in Utah, Oregon, and Montana; in wholesale trade in Oregon, New Mexico, Wyoming, and Montana; in finance, insurance, and real estate in Wyoming; in services in Arizona, Oregon, and New Mexico; and in government in Montana. In addition, Nevada, New Mexico, and Wyoming had above-average increases in transfer payments.

In Kansas, Georgia, and Nebraska, the increases in earnings were above average in farming. In Kansas and Georgia, the increases were above average in construction; in Georgia, the increase partly reflected the preparation for the 1996 Summer Olympic Games. In addition, earnings increased at above-average rates in mining and durable goods manufacturing in Kansas, in retail trade in Georgia, and in government in Nebraska. Nebraska also had an above-average increase in transfer payments.

In Kansas and Washington, the above-average increases in earnings in durable goods manufacturing reflected a rebound from the effects of a strike in the aircraft industry in the fourth quarter of 1995.

2. In this article, an increase in an industry's earnings in a State or an increase in a component of personal income in a State is "above average" (or "below average") if it is more than (or less than) the increase in personal income in the State.

Data Availability

Quarterly estimates beginning with 1969 are available from the Regional Economic Information System, Regional Economic Measurement Division, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or e-mail reis.remd@bea.doc.gov, or call (202) 606-5360.

In Florida, the growth in personal income was boosted by above-average increases in transfer payments and in dividend, interest, and rental income. The increase in rental income reflected a rebound from the effects of the property damage caused by Hurricane Opal in the fourth quarter of 1995. In addition, the increases in earnings were above average in farming, mining, construction, retail trade, and government.

Slowest growing States

In Pennsylvania, Hawaii, Massachusetts, New Jersey, and Ohio, personal income increased at least 0.6 percentage point less than the U.S. average. In Delaware, personal income was unchanged, and in Michigan, personal income declined.

In Michigan, Delaware, Ohio, and New Jersey, the growth in personal income was dampened by

declines in earnings in both durable goods and nondurable goods manufacturing; the declines in durable goods manufacturing partly reflected the effects of a strike in the motor vehicle industry late in the first quarter. In addition, earnings either declined or increased at below-average rates in mining in Delaware and New Jersey, in transportation and public utilities in Ohio and New Jersey, in construction and wholesale trade in New Jersey, and in finance, insurance, and real estate in Delaware. In Michigan, Ohio, and New Jersey, dividend, interest, and rental income either changed little or increased at below-average rates.

In Pennsylvania, Hawaii, and Massachusetts, earnings declined in durable goods manufacturing. Earnings declined, were unchanged, or increased at below-average rates in nondurable goods manufacturing in Pennsylvania and Hawaii, in transportation and public utilities in Pennsylvania and Massachusetts, in finance, insurance, and real estate in Hawaii and Massachusetts, in farming in Massachusetts, and in construction and wholesale trade in Hawaii. In all three States, dividend, interest, and rental income either declined or increased at below-average rates.
